Chapter 2: Polynomials

Previous year board questions, topic-wise: 3 questions

The tag after each question gives the board paper and the marks. Solutions are in a separate PDF with the same question numbers.

1 Zeroes and coefficients of a quadratic polynomial

1. If the sum of zeroes of the polynomial $p(x) = 2x^2 - k\sqrt{2}x + 1$ is $\sqrt{2}$, then the value of k is: (a) $\sqrt{2}$ (b) 2 (c) $2\sqrt{2}$ (d) $\frac{1}{2}$ **CBSE 2024, 1 mark**
2. The zeroes of a polynomial $x^2 + px + q$ are twice the zeroes of the polynomial $4x^2 - 5x - 6$. The value of p is: (a) $-\frac{5}{2}$ (b) $\frac{5}{2}$ (c) -5 (d) 10 **CBSE 2024, 1 mark**

2 Zeroes from the graph

3. Assertion (A): If the graph of a polynomial touches the x -axis at only one point, then the polynomial cannot be a quadratic polynomial. Reason (R): A polynomial of degree n ($n > 1$) can have at most n zeroes. Choose: (a) Both A and R are true and R is the correct explanation of A. (b) Both A and R are true but R is not the correct explanation of A. (c) A is true but R is false. (d) A is false but R is true. **CBSE 2024, 1 mark**
