Chapter 3: Shares and Dividend

Every formula and result of the chapter on one sheet

1	Share at par	$M.V. = N.V.$
2	Share at a premium	$M.V. = N.V. + \text{premium}$
3	Share at a discount	$M.V. = N.V. - \text{discount}$
4	Number of shares	$\frac{\text{sum invested}}{M.V. \text{ of one share}}$
5	Sum invested	Number of shares $\times$ M.V. of one share
6	Dividend on one share	$\frac{\text{rate of dividend} \times N.V.}{100}$
7	Total (annual) dividend	Number of shares $\times$ dividend on one share
8	Return %	$\frac{\text{dividend on one share}}{M.V. \text{ of one share}} \times 100$
9	Dividend and return	Rate of dividend $\times$ N.V. = return % $\times$ M.V.
10	Sale proceeds	Number of shares sold $\times$ M.V. at the time of sale
11	Profit on sale	Sale proceeds – sum invested
