Chapter 24: Measures of Central Tendency (Mean, Median, Quartiles and Mode)

Previous year board questions, topic-wise: 4 questions

The tag after each question gives the board examination year and the marks. Solutions are in a separate PDF with the same question numbers.

1 Mean of raw and tabulated data

1. Assertion (A): The mean of the first 9 natural numbers is 4.5. Reason (R): Mean = $\frac{\text{sum of all the observations}}{\text{total number of observations}}$. (a) A true, R false (b) A false, R true (c) both true, and R is the correct reason for A (d) both true, but R is not the correct reason for A **ICSE 2025, 1 mark**
2. For the data below, find (a) the mean, to the nearest whole number (b) the median.

ICSE 2025, 3 marks

x	10	11	12	13	14	15	16
f	3	2	2	6	3	5	3

2 Mean of grouped data

3. The table gives the running times of some films. Find the mean running time by the step-deviation method. **ICSE 2024, 3 marks**

Duration (minutes)	100–110	110–120	120–130	130–140	140–150	150–160
Number of films	5	10	17	8	6	4

3 Median of raw data

4. The numbers 27, 31, 46, 52, x , $x + 4$, 71, 79, 85, 90 are in ascending order and their median is 64. Find x . (a) 60 (b) 61 (c) 62 (d) 66 **ICSE 2024, 1 mark**

These questions are based on questions asked in past board examinations. They have been reworded by MathSetu, the figures are redrawn, and the solutions are MathSetu's own. MathSetu is an independent study resource and is not affiliated with or endorsed by CBSE, CISCE, NCERT or any publisher.
