Chapter 1: GST (Goods and Services Tax)

Step-by-step solutions to the previous year questions

The question numbers match the PYQ question sheet.

1 Sales within a state: CGST and SGST

1. An article has a marked price of ₹1375, and CGST is charged at 4%. What is its price including GST? (a) ₹55 (b) ₹110 (c) ₹1430 (d) ₹1485 ICSE 2025, 1 mark

SOLUTION

CGST and SGST are equal, so the total GST rate is $4\% + 4\% = 8\%$.

GST $= 8\%$ of $1375 = 110$, so the price is $1375 + 110 = 1485$.

Answer: (d)

2. In a sale within a state, the CGST on an article marked at ₹2000 is ₹120. What is the rate of GST? (a) 6% (b) 10% (c) 12% (d) 16.67% ICSE 2024, 1 mark

SOLUTION

CGST rate $= \dfrac{120}{2000} \times 100 = 6\%$

CGST is half of the GST, so the GST rate is $2 \times 6\% = 12\%$.

Answer: (c)

2 A bill with several items

3. A bill lists 6 pieces of article A (marked price ₹190 each, GST 12%) and 12 pieces of article B (marked price ₹50 each, GST 18%). A discount of 5% is given on an article when 10 or more pieces of it are bought. The customer paid ₹2000, taken as the bill rounded to the nearest ₹10. Is this amount correct? ICSE 2025, 4 marks

SOLUTION

Article A: $190 \times 6 = 1140$. Only 6 pieces, so no discount. GST $= 12\%$ of $1140 = 136.80$. Amount $= 1276.80$.

Article B: $50 \times 12 = 600$. Discount $= 5\%$ of $600 = 30$, so the taxable value is 570. GST $= 18\%$ of $570 = 102.60$. Amount $= 672.60$.

Total $= 1276.80 + 672.60 = 1949.40$, which is ₹1950 to the nearest ₹10.

Answer: the amount paid is not correct. The customer should have paid ₹1950, not ₹2000.

4. A sweet shop bill has 2 kg of laddu at ₹500 per kg (GST 5%) and 12 pastries at ₹100 each (GST 18%). Find (a) the total GST paid (b) the total bill amount including GST. ICSE 2024, 3 marks

SOLUTION

Laddu: $500 \times 2 = 1000$, and GST $= 5\%$ of $1000 = 50$.

Pastries: $100 \times 12 = 1200$, and GST $= 18\%$ of $1200 = 216$.

(a) Total GST $= 50 + 216 = 266$

(b) Bill $= 1000 + 1200 + 266$

Answer: (a) ₹266 (b) ₹2466

5. A shopper buys hair oil priced at ₹1200 with a discount of ₹100 (GST 18%) and cashew nuts priced at ₹600 with no discount (GST 12%). Find (a) the total GST paid (b) the total bill amount including GST. ICSE 2023, 3 marks

SOLUTION

Hair oil: taxable value $= 1200 - 100 = 1100$, and GST $= 18\%$ of $1100 = 198$.

Cashew nuts: GST $= 12\%$ of $600 = 72$.

(a) Total GST $= 198 + 72 = 270$

(b) Bill $= 1100 + 600 + 270$

Answer: (a) ₹270 (b) ₹1970

6. A man buys medicines costing ₹950 (GST 5%), a pair of shoes costing ₹3000 (GST 18%) and a laptop bag costing ₹1000 with a discount of 30% (GST 18%). Find (a) the total GST paid (b) the total bill amount including GST. ICSE 2020, 4 marks

SOLUTION

Medicines: GST $= 5\%$ of $950 = 47.50$.

Shoes: GST $= 18\%$ of $3000 = 540$.

Bag: price after discount $= 1000 - 300 = 700$, and GST $= 18\%$ of $700 = 126$.

(a) Total GST $= 47.50 + 540 + 126 = 713.50$

(b) Bill $= 950 + 3000 + 700 + 713.50$

Answer: (a) ₹713.50 (b) ₹5363.50

3 What GST is

7. The printed price of an article is ₹3080 and the rate of GST is 10%. Find the GST charged. (a) ₹154 (b) ₹308 (c) ₹30.80 (d) ₹15.40 ICSE 2023, 1 mark

SOLUTION

GST $= 10\%$ of $3080 = 308$

Answer: (b)
