Chapter 4: Linear Inequations (In One Variable)

Every formula and result of the chapter on one sheet

1	Adding or subtracting	$a < b \Rightarrow a + c < b + c$ and $a - c < b - c$
2	Multiplying by a positive number	$a < b,\ c > 0 \Rightarrow ac < bc$
3	Multiplying by a negative number	$a < b,\ c < 0 \Rightarrow ac > bc$
4	Dividing by a negative number	$a < b,\ c < 0 \Rightarrow \frac{a}{c} > \frac{b}{c}$
5	Interchanging the sides	$a < b \Leftrightarrow b > a$
6	Replacement sets	$N = \{1, 2, 3, \dots\}$, $W = \{0, 1, 2, \dots\}$, $Z = \{\dots, -1, 0, 1, \dots\}$, R = real numbers
7	Included end value ($\leq$, $\geq$)	Filled (dark) circle
8	Excluded end value ($<$, $>$)	Hollow circle
9	"and"	Intersection of the solution sets
10	"or"	Union of the solution sets
