Chapter 24: Measures of Central Tendency (Mean, Median, Quartiles and Mode)

Daily practice problems: 10 questions with an answer key

Try every question on your own first. The answer key is on the last page.

1. Find the mean of 12, 15, 9, 21, 18.

2. The mean of 5 numbers is 18. If one number is excluded, the mean of the rest is 16. Find the excluded number.

3. Values 2, 4, 6, 8, 10 have frequencies 3, 5, 8, 3, 1. Find the mean.

4. Classes 0–10, 10–20, 20–30, 30–40 have frequencies 5, 10, 20, 5. Find the mean.

5. Find the median of 21, 8, 15, 30, 12, 19, 25.

6. Find the median of 5, 9, 14, 20, 26, 31.

7. For the data 2, 5, 7, 8, 10, 13, 15, 18, 21, 24, 27, find Q_1 and Q_3.

8. For the data in the previous question, find the inter-quartile range.

9. Find the mode of 3, 5, 8, 5, 9, 5, 8, 3, 8, 5.

10. Values 10, 11, 12, 13, 14 have frequencies 2, 5, 9, 6, 3. Find the median and the mode.

MathSetu

Answer Key

1. 15
2. $90 - 64 = 26$
3. $\frac{108}{20} = 5.4$
4. $\frac{850}{40} = 21.25$
5. In order: 8, 12, 15, 19, 21, 25, 30; median 19
6. $\frac{14 + 20}{2} = 17$
7. $n = 11$: Q_1 is the 3rd term $= 7$; Q_3 is the 9th term $= 21$
8. 14
9. 5
10. $n = 25$; the 13th term is 12, so the median is 12; the mode is 12
