Chapter 18: Tangents and Intersecting Chords

Previous year board questions, topic-wise: 12 questions

The tag after each question gives the board examination year and the marks. Solutions are in a separate PDF with the same question numbers.

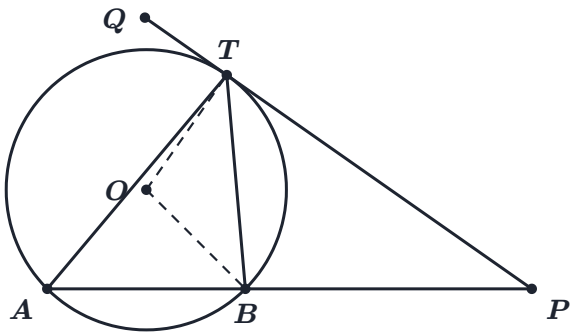

1 Tangent and secant from an external point

1. PT is a tangent to a circle at T, and a line through P cuts the circle at R and S, with R nearer to P. (a) Prove that $\triangle PTR \sim \triangle PST$. (b) Prove that $PT^2 = PR \times PS$. (c) If $PR = 4$ cm and $PS = 16$ cm, find PT. ICSE 2025, 3 marks

2. A circle has centre O and radius 9 cm. The diameter AB is produced to a point P, and PQ is a tangent from P. If $PA = 24$ cm, find PQ. ICSE 2024, 3 marks

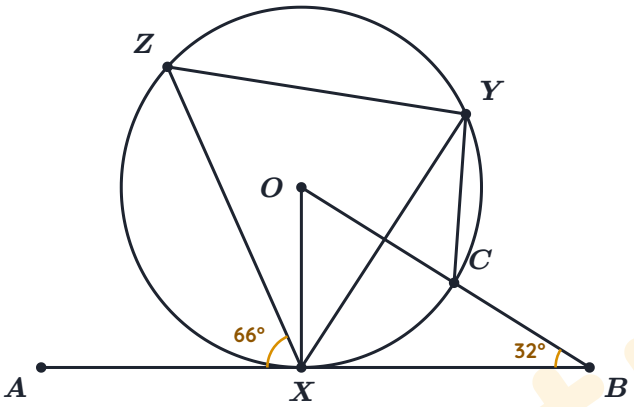

3. PQ is a tangent to a circle with centre O at T. The chord AB produced meets the tangent at P. $AB = 9$ cm, $BP = 16$ cm, $\angle PTB = 50°$ and $\angle OBA = 45°$. Find (a) PT (b) $\angle BAT$ (c) $\angle BOT$ (d) $\angle ABT$. ICSE 2023, 4 marks

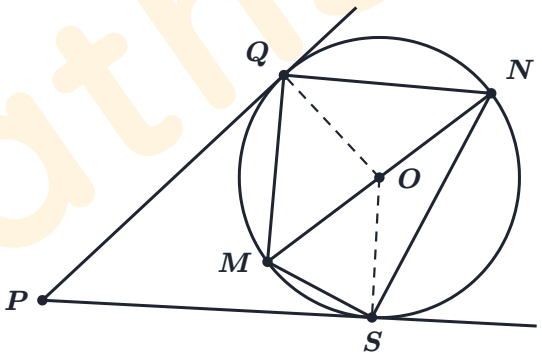

MathSetu

2 The alternate segment theorem

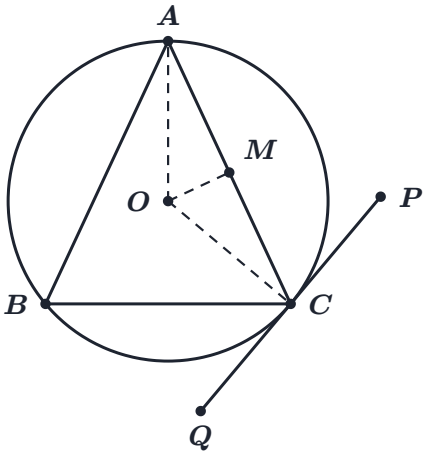

4. X, Y, Z and C lie on a circle with centre O. AB is the tangent at X, OB cuts the circle at C, and $ZY = XY$. Given $\angle OBX = 32°$ and $\angle AXZ = 66°$, find (a) $\angle BOX$ (b) $\angle CYX$ (c) $\angle ZYX$ (d) $\angle OXY$. ICSE 2025, 4 marks

5. PR and PT are tangents from P to a circle with centre O, touching it at Q and S. MN is a diameter, with M on the arc QS nearer to P. Given $\angle PQM = 42°$ and $\angle PSM = 25°$, find (a) $\angle OQM$ (b) $\angle QNS$ (c) $\angle QOS$ (d) $\angle QMS$. ICSE 2024, 4 marks

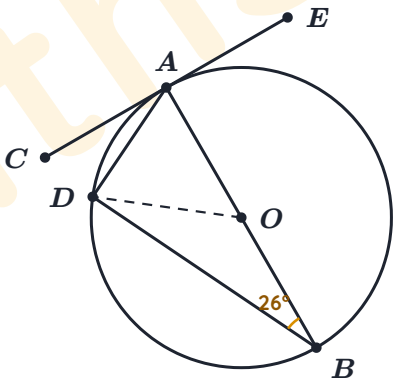

6. An isosceles triangle ABC with $AB = AC$ is inscribed in a circle with centre O. PQ is the tangent at C, with Q on the side of BC away from A. OM is perpendicular to the chord AC and $\angle COM = 65°$. Find (a) $\angle ABC$ (b) $\angle BAC$ (c) $\angle BCQ$. ICSE 2024, 3 marks

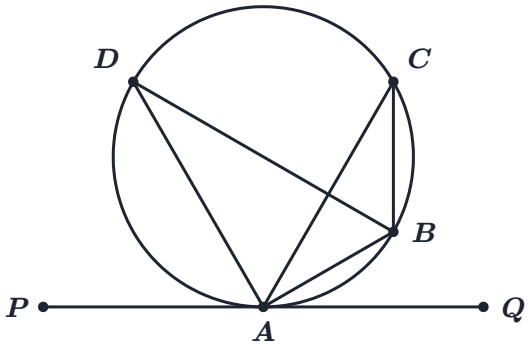

7. RT is a tangent to a circle at S. P and Q are points on the circle with $\angle PST = 30°$ and $\angle SPQ = 60°$. Find $\angle PSQ$. (a) $40°$ (b) $30°$ (c) $60°$ (d) $90°$ ICSE 2023, 1 mark

8. AB is a diameter of a circle with centre O, and CE is the tangent at A. D is a point on the circle on the same side of AB as C, with $\angle ABD = 26°$. Find (a) $\angle BDA$ (b) $\angle BAD$ (c) $\angle CAD$ (d) $\angle ODB$.
ICSE 2023, 4 marks

9. PQ is a tangent to a circle at A. B, C and D are points on the circle such that AB bisects $\angle CAQ$ and AD bisects $\angle PAC$. If $\angle BAQ = 30°$, prove that (a) BD is a diameter (b) $\triangle ABC$ is isosceles.
ICSE 2017, 3 marks

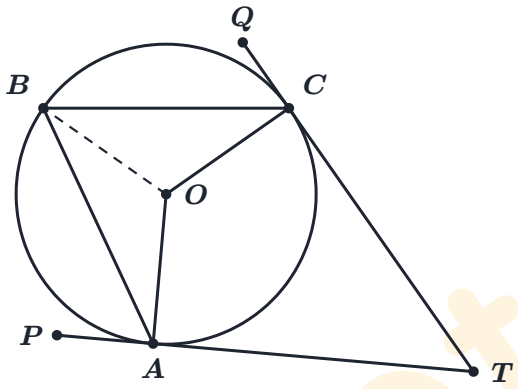

MathSetu

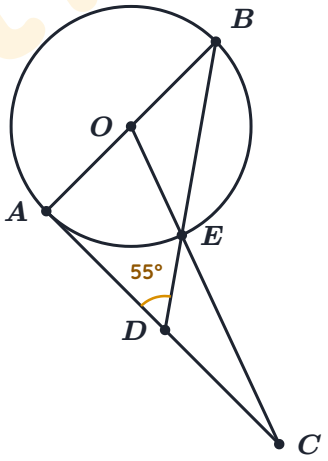

3 Tangent properties

10. PS and PT are tangents to a circle from P, with $\angle SPT = 80°$. Q is a point on the circle with $SQ \parallel PT$. Find $\angle QST$. (a) $140°$ (b) $90°$ (c) $80°$ (d) $50°$ ICSE 2024, 1 mark

11. TP and TQ are tangents to a circle with centre O, touching it at A and C. B is a point on the circle with $\angle BCQ = 55°$ and $\angle BAP = 60°$. Find (a) $\angle OBA$ and $\angle OBC$ (b) $\angle AOC$ (c) $\angle ATC$.
ICSE 2020, 4 marks

12. AB is a diameter of a circle with centre O, and AC is the tangent at A. D is a point on AC, and BD cuts the circle at E. The line OE produced meets the tangent at C. If $\angle ADB = 55°$, find $x = \angle ACO$ and $y = \angle AOE$. ICSE 2019, 3 marks

These questions are based on questions asked in past board examinations. They have been reworded by MathSetu, the figures are redrawn, and the solutions are MathSetu's own. MathSetu is an independent study resource and is not affiliated with or endorsed by CBSE, CISCE, NCERT or any publisher.
