Chapter 9: Simple and Compound Interest

Every formula and result of the chapter on one sheet

1	Simple interest	$I = \frac{PRT}{100}$
2	Amount	$A = P + I$
3	Principal	$P = \frac{100I}{RT}$
4	Rate	$R = \frac{100I}{PT}$
5	Time	$T = \frac{100I}{PR}$
6	Principal from amount (S.I.)	$P = \frac{100A}{100 + RT}$
7	Compound amount	$A = P\left(1 + \frac{R}{100}\right)^{n}$
8	Compound interest	$A - P$
9	Different rates	$A = P\left(1 + \frac{R_1}{100}\right)\left(1 + \frac{R_2}{100}\right)$
10	Half-yearly	$A = P\left(1 + \frac{R}{200}\right)^{2n}$
11	C.I. − S.I. for 2 years	$P\left(\frac{R}{100}\right)^{2}$
12	Depreciation	$P\left(1 - \frac{R}{100}\right)^{n}$
