CLASS 8 · ICSE · SELINA CONCISE MATHEMATICS · FORMULA BANK

Chapter 16: Understanding Shapes

Every formula and result of the chapter on one sheet

1	Interior angle sum	$(n-2)\times 180^\circ$
2	In right angles	$(2n-4)$ right angles
3	Exterior angle sum	360°
4	Interior + exterior at a vertex	180°
5	Regular polygon, exterior angle	$\dfrac{360^\circ}{n}$
6	Regular polygon, interior angle	$\dfrac{(n-2)\times 180^\circ}{n}$
7	Number of sides	$\dfrac{360^\circ}{\text{exterior angle}}$
8	Diagonals from one vertex	$n-3$
9	Number of diagonals	$\dfrac{n(n-3)}{2}$
10	Triangles from one vertex	$n-2$
11	Regular pentagon, hexagon, octagon	108°, 120°, 135°
12	Convex polygon	Every interior angle less than 180°
