Chapter 11: Inequalities

Every formula and result of the chapter on one sheet

1	Side and angle	Greater side has the greater opposite angle
2	Angle and side	Greater angle has the greater opposite side
3	Triangle inequality	Sum of any two sides $>$ third side
4	Difference of sides	Difference of any two sides $<$ third side
5	Limits of the third side	$a - b < x < a + b$
6	Test for three lengths	Two shorter lengths together $>$ the longest
7	Hypotenuse	Longest side of a right-angled triangle
8	Shortest distance	The perpendicular from a point to a line
9	Exterior angle	Greater than each interior opposite angle
10	Medians	Perimeter $>$ sum of the three medians
11	Quadrilateral	Perimeter $>$ sum of the diagonals
