Chapter 19: Mean and Median

Every formula and result of the chapter on one sheet

1	Mean	$\bar{x} = \dfrac{\sum x}{n}$
2	Sum of the values	$\sum x = n\bar{x}$
3	Deviations from the mean	$\sum(x - \bar{x}) = 0$
4	Each value $+a$	Mean $+a$
5	Each value $\times a$	Mean $\times a$
6	Mean with frequencies	$\bar{x} = \dfrac{\sum fx}{\sum f}$
7	Combined mean	$\dfrac{n_1\bar{x}_1 + n_2\bar{x}_2}{n_1 + n_2}$
8	Corrected sum	Recorded sum $-$ wrong value $+$ correct value
9	Median, n odd	$\left(\dfrac{n+1}{2}\right)$th value
10	Median, n even	Mean of the $\left(\dfrac{n}{2}\right)$th and $\left(\dfrac{n}{2}+1\right)$th values
11	Mean of the first n natural numbers	$\dfrac{n+1}{2}$
12	New value from a change of mean	New sum $-$ old sum
