Chapter 13: Ratio and Proportion

Every formula and result of the chapter on one sheet

1	Sharing in $a : b : c$	one part $= \dfrac{\text{total}}{a+b+c}$
2	Proportion	$a : b = c : d \iff ad = bc$
3	Fourth proportional to a, b, c	$\dfrac{bc}{a}$
4	Mean proportional between a and b	$\sqrt{ab}$
5	Direct proportion	$\dfrac{x_1}{y_1} = \dfrac{x_2}{y_2}$
6	Inverse proportion	$x_1 y_1 = x_2 y_2$
