Chapter 12: Simple and Compound Interest

Every formula and result of the chapter on one sheet

1	Simple interest	$\dfrac{P \times R \times T}{100}$
2	Amount (simple)	$P + \mathrm{SI}$
3	Amount (compound, yearly)	$P\left(1 + \dfrac{R}{100}\right)^{n}$
4	Compound interest	$A - P$
5	Half-yearly compounding	rate $\dfrac{R}{2}$, periods $2n$
6	Depreciation	$P\left(1 - \dfrac{R}{100}\right)^{n}$
7	Difference in 2 years	$\mathrm{CI} - \mathrm{SI} = P\left(\dfrac{R}{100}\right)^{2}$
