Chapter 15: Speed, Distance and Time

Every formula and result of the chapter on one sheet

1	Speed	$\dfrac{\text{distance}}{\text{time}}$
2	km/h to m/s	multiply by $\dfrac{5}{18}$
3	m/s to km/h	multiply by $\dfrac{18}{5}$
4	Average speed	$\dfrac{\text{total distance}}{\text{total time}}$
5	Same distance at speeds x and y	$\dfrac{2xy}{x+y}$
6	Opposite directions	relative speed $= x + y$
7	Same direction	relative speed $= x - y$
8	Train crossing a pole	distance $= L$
9	Train crossing a platform	distance $= L + P$
10	Downstream and upstream	$u + v$ and $u - v$
