Chapter 4: Linear Inequations (In One Variable)

Step-by-step solutions to the previous year questions

The question numbers match the PYQ question sheet.

1 Solution set and the replacement set

1. Find the solution set of $0 < -\frac{x}{3} < 2, x \in Z$. (a) $\{-5, -4, -3, -2, -1\}$ (b) $\{-6, -5, -4, -3, -2, -1\}$ (c) $\{-5, -4, -3, -2, -1, 0\}$ (d) $\{-6, -5, -4, -3, -2, -1, 0\}$ **ICSE 2025, 1 mark**

SOLUTION

Multiply through by -3 . Multiplying by a negative number reverses the signs: $0 > x > -6$.

The integers between -6 and 0 (both excluded) are $-5, -4, -3, -2, -1$.

Answer: (a)

2 Combining inequations

2. Solve $2x - \frac{5}{3} < \frac{3x}{5} + 10 \leq \frac{4x}{5} + 11, x \in R$. Write the solution set and show it on the number line. **ICSE 2025, 3 marks**

SOLUTION

Left part: $2x - \frac{3x}{5} < 10 + \frac{5}{3}$, so $\frac{7x}{5} < \frac{35}{3}$ and $x < \frac{25}{3}$.

Right part: $10 - 11 \leq \frac{4x}{5} - \frac{3x}{5}$, so $-1 \leq \frac{x}{5}$ and $x \geq -5$.

Solution set: $\left\{x : -5 \leq x < 8\frac{1}{3}, x \in R\right\}$

Solid dot at -5 (included), hollow circle at $8\frac{1}{3}$ (excluded)

These questions are based on questions asked in past board examinations. They have been reworded by MathSetu, the figures are redrawn, and the solutions are MathSetu's own. MathSetu is an independent study resource and is not affiliated with or endorsed by CBSE, CISCE, NCERT or any publisher.
