Chapter 3: Shares and Dividend

Every formula and result of the chapter on one sheet

1	Share at par	$\text{M.V.} = \text{N.V.}$
2	Share at a premium	$\text{M.V.} = \text{N.V.} + \text{premium}$
3	Share at a discount	$\text{M.V.} = \text{N.V.} - \text{discount}$
4	Number of shares	$\dfrac{\text{sum invested}}{\text{M.V. of one share}}$
5	Sum invested	Number of shares $\times$ M.V. of one share
6	Dividend on one share	$\dfrac{\text{rate of dividend} \times \text{N.V.}}{100}$
7	Total (annual) dividend	Number of shares $\times$ dividend on one share
8	Return %	$\dfrac{\text{dividend on one share}}{\text{M.V. of one share}} \times 100$
9	Dividend and return	Rate of dividend $\times$ N.V. $=$ return % $\times$ M.V.
10	Sale proceeds	Number of shares sold $\times$ M.V. at the time of sale
11	Profit on sale	Sale proceeds $-$ sum invested
