CLASS 10 · ICSE · SELINA CONCISE MATHEMATICS · PYQ

Chapter 6: Solving Problems Based on Quadratic Equations

Previous year board questions, topic-wise: 6 questions

The tag after each question gives the board examination year and the marks. Solutions are in a separate PDF with the same question numbers.

1 Problems on speed, distance and time

1. A couple drive 350 km to a hill station. Heavy rain reduces their average speed by 20 km/h, and the journey takes 2 hours longer. Find (a) the original speed of the car (b) the time taken at the reduced speed. ICSE 2025, 4 marks

2. A man travels 100 km at a uniform speed of x km/h. At a speed 5 km/h faster, the journey would have taken 1 hour less. Find x. ICSE 2023, 3 marks

2 Problems on numbers

3. Two natural numbers differ by 7 and their product is 450. Find the numbers. ICSE 2020, 3 marks

4. Two consecutive multiples of 3 are natural numbers with a product of 810. Find them. ICSE 2019, 3 marks

3 Problems on cost and on work

5. ₹7500 is divided equally among some children. With 20 fewer children, each would have received ₹100 more. Find the original number of children. ICSE 2018, 3 marks

4 Problems on ages

6. The ages of two brothers add up to 47 years, and the product of their ages is 550. Find their ages. ICSE 2017, 4 marks

These questions are based on questions asked in past board examinations. They have been reworded by MathSetu, the figures are redrawn, and the solutions are MathSetu's own. MathSetu is an independent study resource and is not affiliated with or endorsed by CBSE, CISCE, NCERT or any publisher.
