Chapter 7: Percent and Percentage

Every formula and result of the chapter on one sheet

1	Per cent	$x\% = \frac{x}{100}$
2	Fraction to per cent	Multiply by 100
3	Percentage of a quantity	$\frac{x}{100} \times$ quantity
4	One quantity as a percentage of another	$\frac{\text{first}}{\text{second}} \times 100$
5	Whole from a part	Part $\times \frac{100}{\text{percentage}}$
6	Percentage change	$\frac{\text{change}}{\text{original}} \times 100$
7	After an increase of $x\%$	Original $\times \left(1 + \frac{x}{100}\right)$
8	After a decrease of $x\%$	Original $\times \left(1 - \frac{x}{100}\right)$
9	A is $x\%$ more than B	B is $\frac{100x}{100 + x}\%$ less than A
10	A is $x\%$ less than B	B is $\frac{100x}{100 - x}\%$ more than A
11	Increase then decrease by $x\%$	Net decrease of $\frac{x^2}{100}\%$
12	Common values	$12\frac{1}{2}\% = \frac{1}{8}, 33\frac{1}{3}\% = \frac{1}{3}$
