Chapter 19: Representing 3-D in 2-D

Daily practice problems: 10 questions with an answer key

Try every question on your own first. The answer key is on the last page.

1. How many faces, edges and vertices does a triangular prism have?
2. How many faces, vertices and edges does a hexagonal prism have?
3. A pyramid has 7 vertices. What is the shape of its base, and how many edges does it have?
4. A polyhedron has 6 faces and 12 edges. Find the number of vertices.
5. A polyhedron has 9 faces and 9 vertices. Find the number of edges.
6. Can a polyhedron have 7 faces, 10 vertices and 16 edges?
7. Name the solid whose net has one square and four triangles.
8. On a die, which number is opposite 3?
9. Write the front, side and top views of an upright cylinder.
10. Is a cone a polyhedron? Give a reason.

MathSetu

Answer Key

1. 5 faces, 9 edges, 6 vertices
2. 8, 12 and 18
3. A hexagon; 12 edges
4. 8
5. 16
6. No; $7 + 10 - 16 = 1$
7. A square pyramid
8. 4
9. Rectangle, rectangle, circle
10. No; it has a curved surface
