CLASS 8 · CBSE · GANITA PRAKASH PART 2 · FORMULA BANK

Chapter 5: Tales by Dots and Lines

Every formula and result of the chapter on one sheet

1	Mean	$\dfrac{\text{sum of the values}}{\text{number of values}}$
2	Sum from the mean	Mean $\times$ number of values
3	Median, odd number n of values	The $\dfrac{n+1}{2}$th value in order
4	Median, even number n of values	Mean of the $\dfrac{n}{2}$th and $\left(\dfrac{n}{2}+1\right)$th values
5	Balance property	Total distance below the mean $=$ total distance above
6	Add k to every value	Mean and median increase by k
7	Multiply every value by k	Mean and median are multiplied by k
8	Mean with frequencies	$\dfrac{\text{sum of (value} \times \text{frequency)}}{\text{sum of frequencies}}$
9	New mean after including v	$\dfrac{an+v}{n+1}$
10	Spreadsheet total	=SUM(Start:End)
11	Spreadsheet mean	=AVERAGE(Start:End)
12	Line graph	Shows change over time; steeper means faster change
