CLASS 9 · ICSE · SELINA CONCISE MATHEMATICS · FORMULA BANK

Chapter 15: Construction of Polygons

Every formula and result of the chapter on one sheet

1	Quadrilateral	5 measurements
2	Parallelogram	3 measurements
3	Rectangle, rhombus	2 measurements
4	Square	1 measurement
5	Parallelogram	Opposite sides equal; diagonals bisect each other
6	Rectangle	Angles 90°; diagonals equal
7	Rhombus	All sides equal; diagonals perpendicular bisectors
8	Rhombus side from diagonals	$\sqrt{\left(\frac{d_1}{2}\right)^2 + \left(\frac{d_2}{2}\right)^2}$
9	Square	Side $= \frac{\text{diagonal}}{\sqrt{2}}$
10	Trapezium	Draw CE parallel to DA; $EB = AB - DC$
11	Regular hexagon	Interior angle 120°; side = circumradius
12	Regular polygon, interior angle	$\frac{(2n-4) \times 90^\circ}{n}$
