Chapter 14: Rectilinear Figures

Every formula and result of the chapter on one sheet

1	Interior angle sum	$(n-2)\times 180^\circ$
2	Exterior angle sum	360°
3	Regular polygon, exterior angle	$\dfrac{360^\circ}{n}$
4	Regular polygon, interior angle	$180^\circ-\dfrac{360^\circ}{n}$
5	Number of sides	$n=\dfrac{360^\circ}{\text{exterior angle}}$
6	Number of diagonals	$\dfrac{n(n-3)}{2}$
7	Quadrilateral	Angle sum 360°
8	Parallelogram	Opposite sides and angles equal; diagonals bisect each other
9	Sufficient condition	One pair of opposite sides equal and parallel
10	Rectangle	Diagonals equal and bisect each other
11	Rhombus	Diagonals bisect each other at 90° and bisect the angles
12	Square	Diagonals equal, perpendicular, bisect each other
13	Trapezium	Co-interior angles between the parallel sides add up to 180°
14	Kite	One diagonal is the perpendicular bisector of the other
