Chapter 18: Statistics

Daily practice problems: 10 questions with an answer key

Try every question on your own first. The answer key is on the last page.

1. Find the range of 14, 27, 9, 31, 18, 22, 40, 12.
2. Find the class mark and class size of the class 25–35.
3. Convert 10–19, 20–29, 30–39 to exclusive form.
4. The class marks of a distribution are 47, 52, 57, 62. Find the class size and the first class.
5. In an exclusive distribution with classes 0–5, 5–10, 10–15, in which class does 10 fall?
6. The frequencies of five classes are 4, 9, 15, 8, 4. Write the cumulative frequencies.
7. The cumulative frequencies of a distribution are 5, 12, 25, 33, 40. Write the frequencies.
8. State whether each variable is discrete or continuous: (i) number of goals in a match (ii) temperature of a city.
9. A class 30–40 has frequency 9. At which point is it plotted in a frequency polygon?
10. Why must inclusive classes be converted before drawing a histogram?

MathSetu

Answer Key

1. $40 - 9 = 31$
2. 30 and 10
3. 9.5–19.5, 19.5–29.5, 29.5–39.5
4. 5; 44.5–49.5
5. 10–15
6. 4, 13, 28, 36, 40
7. 5, 7, 13, 8, 7
8. (i) Discrete (ii) Continuous
9. $(35, 9)$
10. So that the rectangles are adjacent with no gaps; the data are continuous
