CLASS 9 · ICSE · SELINA CONCISE MATHEMATICS · FORMULA BANK

Chapter 18: Statistics

Every formula and result of the chapter on one sheet

1	Range	Greatest value − least value
2	Class size	Upper boundary − lower boundary
3	Class mark	$\frac{\text{lower limit} + \text{upper limit}}{2}$
4	Class size from class marks	Difference of two consecutive class marks
5	Adjustment factor	$\frac{1}{2}\times$ (lower limit of a class − upper limit of the class before)
6	True lower limit	Lower limit − adjustment factor
7	True upper limit	Upper limit + adjustment factor
8	Limits from the class mark	Class mark $\pm\frac{\text{class size}}{2}$
9	Cumulative frequency	Running total of the frequencies
10	Frequency from cumulative frequency	Difference of consecutive cumulative frequencies
11	Histogram	Adjacent rectangles on true class limits
12	Frequency polygon	Points (class mark, frequency), closed on the axis
