Chapter 9: Triangles (Congruency in Triangles)

Every formula and result of the chapter on one sheet

1	Angle sum	$\angle A + \angle B + \angle C = 180^\circ$
2	Exterior angle	Equal to the sum of the two interior opposite angles
3	S.S.S.	Three pairs of sides equal
4	S.A.S.	Two sides and the included angle equal
5	A.S.A.	Two angles and the included side equal
6	A.A.S.	Two angles and a corresponding side equal
7	R.H.S.	Right angle, hypotenuse and one side equal
8	C.P.C.T.	Corresponding parts of congruent triangles are equal
9	Not sufficient	A.A.A. and S.S.A.
10	Perpendicular bisector	Its points are equidistant from the ends of the segment
11	Angle bisector	Its points are equidistant from the arms of the angle
12	Order of vertices	$\triangle ABC \cong \triangle DEF$ means A to D, B to E, C to F
