Chapter 14: Probability

Previous year board questions, topic-wise: 14 questions

The tag after each question gives the board examination year and the marks. Solutions are in a separate PDF with the same question numbers.

1 Complementary events

1. A die is rolled once. Find the probability that the number shown is not 3. (a) $\frac{1}{6}$ (b) $\frac{3}{6}$ (c) $\frac{5}{6}$ (d) 1 **CBSE 2026, 1 mark**
2. A player wins a game with probability 0.79. What is the probability that the player loses it? (a) 1.79 (b) 0.31 (c) 0.21% (d) 0.21 **CBSE 2024, 1 mark**
3. An event happens with probability p and does not happen with probability q . How are p and q related? (a) $p + q = 1$ (b) $p = 1, q = 1$ (c) $p = q - 1$ (d) $p + q + 1 = 0$ **CBSE 2023, 1 mark**
4. In a group of 20 people, 5 cannot swim. One person is chosen at random. Find the probability that the person can swim. (a) $\frac{3}{4}$ (b) $\frac{1}{3}$ (c) 1 (d) $\frac{1}{4}$ **CBSE 2023, 1 mark**

2 Theoretical probability

5. Assertion (A): The probability that a leap year has 53 Mondays is $\frac{2}{7}$. Reason (R): The probability that a non-leap year has 53 Mondays is $\frac{5}{7}$. Choose: (a) both true and R explains A (b) both true but R does not explain A (c) A true, R false (d) A false, R true **CBSE 2026, 1 mark**
6. Assertion (A): When one number is picked at random from the numbers 1 to 20, the probability that it is a number from 1 to 20 is 1. Reason (R): An event E with $P(E) = 1$ is a sure event. Choose: (a) both true and R explains A (b) both true but R does not explain A (c) A true, R false (d) A false, R true **CBSE 2025, 1 mark**
7. The even numbers are removed from the list 1, 4, 7, 9, 16, 21, 25, and one of the remaining numbers is picked at random. Find the probability that it is prime. (a) $\frac{2}{5}$ (b) $\frac{1}{5}$ (c) $\frac{1}{7}$ (d) $\frac{2}{7}$ **CBSE 2024, 1 mark**
8. 6000 lottery tickets are sold. A girl works out that her probability of winning the first prize is 0.08. How many tickets did she buy? (a) 40 (b) 240 (c) 480 (d) 750 **CBSE 2023, 1 mark**
9. A bag holds 4 red, 3 blue and 2 yellow balls. One ball is drawn at random. Find the probability that it is (i) red (ii) yellow. **CBSE 2023, 2 marks**

3 Two dice

10. Two dice of different colours are thrown together. List all the possible outcomes. Find the probability that (i) both dice show the same number (ii) the dice show different numbers.

CBSE 2026, 3 marks

11. Two dice are thrown together. Find the probability that the two numbers differ by 2.

CBSE 2025, 3 marks

12. Two dice are thrown together. Find the probability that the two numbers add up to 2, 3 or 5.

(a) $\frac{7}{36}$ (b) $\frac{11}{36}$ (c) $\frac{5}{36}$ (d) $\frac{4}{9}$ CBSE 2024, 1 mark

4 Playing cards

13. One card is drawn at random from a well-shuffled pack of 52 cards. Find the probability that it is a red face card. CBSE 2025, 1 mark

14. A black card is missing from a pack of 52 playing cards. One card is drawn at random from the rest. Find the probability that it is the queen of hearts. CBSE 2024, 2 marks

These questions are based on questions asked in past board examinations. They have been reworded by MathSetu, the figures are redrawn, and the solutions are MathSetu's own. MathSetu is an independent study resource and is not affiliated with or endorsed by CBSE, CISCE, NCERT or any publisher.
