3 Median of grouped data

6. When data is arranged in order, the observation in the middle is called the: (a) mode (b) median (c) mean (d) deviation **CBSE 2024, 1 mark**
7. In a game of BINGO the host has balls numbered 1 to 75 and calls out the number on a ball picked at random. In one game 48 balls were called, as shown in the table. (i) Name the median class. (ii) Find the probability that the first ball called had an even number. (iii) Find the median of the data, OR find its mode. **CBSE 2024, 4 marks, case study**
